

## [The Da Vinci Code](#)

So what's all the hype about *The Da Vinci Code*. I just finished reading the book. I am really surprised at the kind of reviews it has got. After finishing that there is not much that I consider worth remembering. The author comes so boldly against the Bible in the beginning as though climactically proclaiming that what Langdon is going to expose is going to pose the ultimate challenge to the ultimate best seller. His publisher gasps with awe. (178). Then later on he is not so sure. He says let Bible be. Ha how gracious! (p.369). it was sure a glorious start, but ultimately ended up as hollow as a grave, not holding fast to the proposition it made in the beginning, just giving a loused up hotch potch definition of faith. Could have done better for all the research. Probable have earned what it was aimed and published for. Sad many minds rethink what they have so far believed.

Coming back to the ultimate best seller of all times, Bible is not here to give guidelines on how to make a better universe or to make a better person. It is a battle, a battle to win back the purity from which man has fallen and to restore man to the Most Holy God a prize was paid and Jesus Christ was slain. Jesus Christ is usually described as a soft spoken mild mannered, gentle carpenter. I tell you, He could be like that also, but He is the Lion of Judah. In this knowledge crazy world, even to acknowledge that you are a Christian, requires a lot of guts. And to live like Jesus, you need all the strength He could give. We do not live on dead precepts, written long ago. When we choose to follow the Bible it means that everyday, we literally follow Jesus who is still alive and reigning among us. We walk after Him. It is a living relationship. Jesus speaks loud and clear for all who would listen. It takes courage to proclaim, that betraying your spouse for satiating your own bodily pleasures is sin. It takes courage to proclaim watching pornography is sin. It takes courage to stand for Christ in a lopsided world tipped fully over to sin.
